The Ancient Genesis is a compilation of research spanning four years specifically aimed at studying the first two chapters of the book of Genesis in the Bible/Torah and modern Evolution theory. The research includes commentary from Rabbi Ezra, Rabbi Rambam, Rabbi Ramban (Nachimandies), Rabbi Rashi and Maimondies and many more. Also included is a study of the ancient Hebrew language, culture, and traditions. What is time? What is a day? What is creation? What is evolution? This research aids in bridging a gap between science and scripture that many feel has created a permanent chasm, leaving 75 of college students abandoning faith altogether. If you would like to explore these studies and educate yourself more in the evolution and creation debate, please have a look at this book by simply clicking the picture above and it will take you to the link needed to purchase your print copy. Notice: This book is not in support of mainstream modern interpretations of scripture nor the rejection of evolution. But it is intended to be a fair minded analysis of my findings in my personal search for truth. If you are interested in the eBook version of this work, please go to or and download your copy.
