It covers how to design IT-specific measures and financial metrics as well as the establishment of a software measurement program. From there, it moves on to designing people improvement systems and discusses such topics as leadership, motivation, recruitment, and employee appraisal. The final few chapters show how to use balanced scorecards to manage and measure knowledge-based social enterprising and to identify, analyze, and avoid risks. In addition to covering new methods and metrics for measuring and improving IT processes, the author looks at strategies for measuring product development and implementing continuous innovation.
