The traditional theory of materials mechanics and mechanics of materials to integrate course content. integration. choice and divided into several modules: the contents separate into a book for each module. This book contains the mechanical engineering curriculum in the basic elements: statics and mechanics of materials based on the teaching to meet the basic requirements under the premise that we could achieve improved starting point for refining the content. reduce duplication. to further highlight the basic concepts. basic theory and basic approach. while appropriate to broaden students knowledge. Contents: Introduction Chapter 1 the basic concepts of statics and stress analysis of objects and rigid concept of force 1.1 1.2 1.3 static axioms and inference constraints and constraint forces and stress analysis of objects 1.4 Exercises Chapter 2 by trying to force plane 2.1 Department of force projection and force in the axis point of the moments of 2.2 moment of couple. couple plane simplifies the Department of the simplified system of forces 2.4 2.3 flat plane system of forces and balance equations of equilibrium plane force system equilibrium equations 2.5 Application Examples 2.6 Mixtures balance. statically determinate and statically indeterminate concept of sliding friction and balance 2.7 Exercises Chapter 3 space force 3.1 Cartesian axis in space. power projection force on the shaft 3.2 of moments and moments of force on the point of 3.3 space force 3.4 The balance equation and its application in parallel with the center of gravity system of forces exercises in Chapter 4 the basic concepts of mechanics of materials the task of mechanics of materials 4.1 4.2 4.3 deformation of solids and their underlying assumptions section method...
